LISTING OF CLAIMS

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

- 1. (Canceled).
- 2. (Currently amended) The process in of Claim 1 wherein step (c) further comprises attaching the feed line to the coker vessel at a side entry position A process for repetitively producing and removing coke from a delayed coker vessel, wherein the coker vessel has a bottom portion defining an aperture through which coke is released, comprising:
 - (a) Sealing an aperture closure housing to the bottom portion of the coker vessel;
 - (b) moving a closure member within the closure housing to close the aperture:
 - (c) <u>feeding a heavy hydrocarbon feed into the coker vessel through a feed line</u> <u>attached to the coker vessel at a side entry position above the bottom of the</u> <u>coker vessel:</u>
 - (d) coking the heavy hydrocarbon in the coker vessel;
 - (e) moving the closure member within the closure housing to open the aperture to allow coke removal from the coker vessel; and
 - (f) <u>releasing coke through the aperture, and;</u>

- (g) repeating steps b through f successively.
- 3. (Currently amended) The process in of Claim 1 Claim 2 wherein step (a) further comprises sealing a transition spool piece to the coker vessel bottom and attaching the feed line to the spool piece at a side entry position.
- 4-5. (Canceled).
- 6. (Currently amended) The process of Claim 1 Claim 2 wherein step (a) further comprises sealing a coke chute to the bottom portion of the aperture closure housing.
- 7. (Canceled),
- 8. (Currently amended) The process of Claim 2 Claim 6 wherein step (a) further comprises placing a gasket between the bottom of the closure unit and the coke chute and pressure-tightly joining the closure unit, the gasket and the coke chute.
- 9. (Currently amended) The process of Claim 7 or 8 wherein the gasket comprises an annular corrugated metal bonded to a graphite material.
- 10. 18. (Canceled).
- 19. (Withdrawn) A coker vessel comprising:
 - (a) a vessel having a flanged side aperture and a flanged bottom aperture;
 - (b) a flanged feed pipe fitted to said flanged side aperture;
 - (c) an aperture closure unit fitted and sealed to said bottom aperture;

- (d) a closure member moveable within said closure unit;
- (e) A coke chute sealed to the bottom portion of the closure unit for directing coke from the vessel to a receiving area.
- 20. (Withdrawn) The coker vessel of Claim 19 wherein the closure member comprises a valve.
- 21. (Withdrawn) The coker vessel of Claim 20 wherein the valve is a gate valve, a ball valve, a slide valve, a knife valve or a wedge plug valve.
- 22. (Withdrawn) The coker vessel of Claim 20 wherein the valve further comprises a power actuated valve.
- 23. (Withdrawn) The coker vessel of Claim 20 wherein the bottom aperture is from 30 to 90 inches.
